

STATEMENT FROM FLINDERS POWER RE AUGUSTA POWER STATIONS SITE

THURSDAY 2 MARCH 2017

Long Term Ash Storage Area Program

Flinders Power wishes to advise that final approval has been sought from the relevant regulatory bodies for the application of topsoil to the Augusta Power Stations Ash Storage Area. This follows a meeting and presentation of detailed plans for the ash storage area by Flinders Power, contractor McMahons Services Australia, native revegetation specialists, environmental consultants, a site contamination auditor and other experts to the Environment Protection Authority and the Department of Environment, Water and Natural Resources.

Flinders Power will commence topsoil application on the ash storage area as soon as approval is received.
